***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-36, drawn to method/apparatus for producing metrological scale.

Group II, claim(s) 37-39, drawn to continuous ribbon metrological scale.

Group III, claim(s) 40, drawn to metrological scale of particular thickness.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the same reasons as set forth in the International Publication Number WO03061891A3, for multiple (groups of) inventions in the international application comprising (I) method and apparatus for producing metrological scale by operating a displacement of a substrate relative to a laser beam and (II) a continuous ribbon metrological scale and (III) a metrological scale of thickness lower than 6mm.

A telephone call was made to Oliff and Berridge on January 18, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b)

Art Unit: 1725

if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
